

Product & Technical Configuration

Overview

Used for evaporation and concentration of aqueous or organic-solvent solutions, final-stage saline wastewater treatment and process reboiling. The heat transfer arrangement is selected for the process fluid and available heat source.

Technical Configuration

Item	Configuration
Brand	IKUSE
Equipment types	Evaporator and reboiler
Processes	Evaporation, concentration, saline wastewater treatment and reboiling
Applications	Pharmaceutical, food, chemical and light industries
Reboiler construction	Coil-wound tube bundle
