High-pressure Plug Valves

IKUSE

Overview

Plug-type shut-off valves for high-pressure flowlines. Select the bore, end connection and working-pressure rating for the application.

Construction and Configuration

Available series include SF42, SF70 and SF105. End connections may be unions or internal threads. Check the body configuration, connections and pressure rating for the selected model.

Key Data

Size	Rated working pressure
1″、2″、3″	42、70、105 MPa

Selection

Specify the bore, rated pressure, fluid, temperature and both end connections. Pressure ratings are not interchangeable between models.
