

Overview

Integral fittings for branching, turning and reducing high-pressure flowlines, including wyes, elbows, tees, crosses and reducers.

Construction and Configuration

The series uses integrally formed fittings with optional union ends. Select the matching configuration for each fitting shape and connection size.

Key Data

Size	Series pressure range
2"–4"	21–140 MPa

Selection

Specify the fitting shape, bore at each end, end connections, pressure rating and fluid conditions.
