

Overview

Choke manifolds for well-pressure control, with hydraulic and remote-control arrangements as required.

Construction and Configuration

The manifold comprises valves, choke elements, pipe fittings and supports of the required pressure rating, selected for the well-control system.

Key Data

Working pressure	Nominal bore	Material class	Product specification level
2000–15000 psi	2-1/16"–4-1/16"	EE、 FF	PSL3–PSL4

Selection

Specify the bore, rated pressure, flow-path requirements, control method and connections.
