

Overview

Gripping dies for power tongs, manual tongs, slips and related handling equipment.

Construction and Configuration

Gripping dies are used in manual tongs, power tongs, slips, top drives, iron roughnecks and bucking units. Select conventional, low-marking or non-marking designs for the tubular material and tool model.

Key Data

Material	Surface hardness	Core hardness
One-piece forged alloy structural steel	HRC60	≥HRC35

Selection

Select by equipment model, pipe diameter, rated load or torque, and connection dimensions. Check each size within the same series separately.
