

Overview

Hammer unions for fast assembly and disassembly of high-pressure pipework, with threaded and weld-end configurations.

Construction and Configuration

Threaded-end series include FIG100, FIG200, FIG206, FIG400, FIG402, FIG1002 and FIG1502. Confirm connection dimensions, pressure ratings and seal types separately for each model.

Key Data

Size	Series cold working pressure
1"–4"	7–140 MPa

Selection

Specify the FIG number, bore, working pressure, end connections and material requirements. Unions with similar appearances must not be assumed to be interchangeable.
